

Please note that a pedigree does not include any marriage information, any daughters' information, or any details on wives. It is intended to allow a researcher to identify a family of interest. It is NOT intended to provide all the information that is known on a family. While connections of the lines are probably correct due to the Y-DNA matches, most of the lines themselves are submitted by participants and there may be errors or omissions. Use them as guidepost and always do your own research to confirm your family line. **Please email if you see anything that needs correcting, or if any information on the site is copyrighted or misattributed information, and it will be fixed, credited, or removed immediately.**

We will list all Families, by Earliest Ancestor and Line Leader who wish to be listed. We also hope to eventually locate descendants of each family and to arrange their participation in the DNA project. Participation in the DNA Project is not a requirement for listing on this page, but we will indicate families who have a Harrison male representing them in the DNA Project. We invite you to join the project. You'll need to either be a male Harrison, or have a father, brother, uncle, or cousin who can be tested for you. It's easy, just a cotton swab on the inside of your cheek.

DNA Tested Harrison Family Lines

These lines currently have American or English heads and typically go back to at least 1800. As we make connections with older families in the UK, we will be able to group them into the appropriate family of origin. If you are a Harrison with a known place of origin (for example Nottingham, England), in the UK before 1800 whose Harrison family is not yet represented by a tested lineage group in the project, please e-mail John Harrison at dna@jhamedia.com as we may have sponsorships to cover part or all the testing costs!

Lineage 1-Harrison of Culpepper, Virginia, Surry, North Carolina & Sligo, Ireland Line

Subgroup 1A

William Harrison was in Rowan, then Surry (now Surry and Yadkin Counties), NC, and his children resided in the Surry and Yadkin area before migrating south and west. There is a more distant, 32/37 marker connection to the Harrison line from Sligo, Ireland, indicating a 93% likelihood of a common Harrison ancestor, possibly in the 1500s-1600s. This line is haplogroup **R-M269** and is the "Niall of the Nine Hostages" haplogroup.

The information on this Harrison family comes from the December 1986 issue of Harrison Heritage, p. 753, which is posted in the [Harrison Genealogy Repository](#). According to the article, a widowed mother came to Missouri from North Carolina with her three sons and three daughters. The bible of son William Harrison states that he was born, "on the Sura River," which is probably the Yadkin or Dan Rivers near what is now Surry County, North Carolina near the Virginia border. While this line matches 12/12 markers, additional testing shows a genetic distance of 9 markers. This makes a connection less certain, but there is still a 43% chance of a common Harrison ancestor since 1700, and a 71% chance of a common Harrison ancestor since 1600. Given the proximity of these family, the use of the name "Tyree", and the fact this line doesn't closely match any other Harrison lineage, it is currently still considered part of lineage 1.

According to researcher Michael Harrison, this Harrison line goes back to Ahamlish Parish in Cliffoney, North County Sligo, Ireland. There was a very high density of Harrisons there in the 19th century, and some remained while others emigrated in the late 19th and early 20th century. The connection to the rest of lineage 1 is 32/37, indicating a 93% chance of a common male Harrison ancestor since about the year 1500.

This Harrison family has been traced back to Brandon Parish, Prince George Co., VA. According to *Cincinnati, the Queen City: 1788-1912*, by Charles Goss (1912), Edmond Harrison was from Virginia, and Martha Pitts was born in North Carolina. A daughter, Maria, was born about 1807 in North Carolina. Assuming Edmund was born about 1770, he married probably by 1800 in North Carolina, where he had several children before moving west to Nashville, TN. by 1810. This Harrison family came to Ohio by 1815 and settled in Cincinnati. It matches the line of William Harrison b. 1621 on a perfect 37/37 markers, meaning that there is a better than 97% chance of a common Harrison ancestor within 8 generations, and a 99.6% chance of a common Harrison ancestor within 12 generations.

The Benjamin Harrison family of Cumberland County, Virginia has been the source of much confusion for generations because there were at least two, and perhaps three, Benjamin Harrisons who may--or may not--have been related living in the same area. The connection of Cary Harrison b. 1752 to Benjamin Harrison b. 1715 is speculative. For a good discussion of these Benjamin Harrisons, see http://freepages.genealogy.rootsweb.ancestry.com/~harrisonrep/hhdocs/ben_pris.htm.

Many genealogies connect Robert Harrison b. c1725 to the presidential James River Harrison branch (lineage 34) because Robert purchased Bicars from Benjamin Harrison V, "the Signer" (see <http://buffalogen.blogspot.com/2015/09/the-robert-harrisons-of-charles-city.html> for a discussion of the origins of this line). The line of Robert Harrison closely matches the other members of lineage 2 (64/67 markers) and is not related in genealogical time to lineage group 34. There is a 96% chance that this line connects to members H-18 and H-101 within the last 12 generations, or roughly 300 years, and a 99% chance within the last 16 generations, or since about the year 1600. This line is R-M269.

Lineage 3 - The "Long Grey Trail" Harrisons

Subgroup 3A

This is a large family group comprised of descendants of Isaiah Harrison who migrated from Oyster Bay, Long Island down into the Shenandoah Valley of Virginia in the early 1700s. The data are compiled largely from the seminal work on this family, *Settlers by the Long Grey Trail*, by J. Houston Harrison, 1935. Dates of the third and fourth generation are also from family files located in the Harrison Genealogy Repository:

<http://freepages.genealogy.rootsweb.com/~harrisonrep>. The connection of Andrew Harrison (1771-1824) and Robert Harrison (c1780-1821) comes from Suzanne Bonadeo [suzeb AT biip.net], who found a land record dated 15 Dec 1817 and stated "... Heirs of Jesse Harrison receive a land grant for 789 acres in Jefferson Co., KY. Heirs Robert Harrison of Harrison Co., KY; Jesse and Ann Harrison of Rockingham (VA); Daniel Harrison of Clark Co. (KY); and Andrew Harrison of Champaign Co., OH." The connection of the Joseph Harrison line of NC is through a presumptive son of a second marriage of Isaiah Harrison, and is supported by records in Sussex Co., Delaware and Virginia. Information on the line of Gideon Harrison b. abt 1694 is from Wes Patterson [wespatterson.nc AT gmail.com]. The line of John Harrison b. 1768 (son of Thomas, son of Gideon) is from Charles Harrison's entry in *The Heritage of Polk County, TN 1839-1997*, and from *Harrison Notes*, Feb. 1998, by Dr. Charles Johnson. The Harrison line of Rev. Nathan Thomas Harrison b. 20 Oct 1778 comes from North Carolina or Virginia. The obituary of Rev. Harrison in the *Southern Christian Advocate* 17 Sep 1852, p. 64 gives his birthplace as North Carolina; however, Georgia descendants give it as Virginia. This line is haplogroup **I-M253**.

Daniel Reece Harrison migrated from Abbeville Co., SC to Hardin Co., TN. Also in Hardin County, James A. Harrison is listed in the 1850 census near Martha Harrison, aged 55 (b. abt 1795), born in NC. This Martha was the widow of Jeremiah Harrison, and was listed with a Rachel, Archibald, and Cynthia. In the 1860 census, James A. Harrison had children named Martha and Archibald. It may be coincidence, but it is likely there was a family connection. Several Harrison genealogies show Jeremiah and Daniel as sons of Rachel Harrison of Abbeville, SC, who had one son over 16 and one under 16 in the 1790 census.

The Harrisons of Skipton, Yorkshire

The following families are compiled based on various Yorkshire genealogies. They are at times very confusing to follow as it often not clear which John, Edward, or Joseph is being written about. Some of the Yorkshire Harrisons are haplogroup I. Others are group R. This line is part of lineage group 3. The founder of the family was the Rev. Edward Harrison who came from Swinden, a small village north of Skipton in West Yorkshire, England.

Harrisons of Castleblayney, County Monaghan, Ireland Line

This line comes from Ireland but is clearly connected to the English part of Lineage Group 3. There is a four-marker mismatch on 37 markers, meaning that there is a 90% likelihood of a common Harrison ancestor since about the year 1380. The lines likely connect in the UK. This line was researched and compiled by Polly Lynn (pkLjdL AT gmail.com).

Lineage 5-The Cheshire, England and Westmoreland County, Virginia Harrisons

The American founder of this line settled in Virginia in the 1670s, and many descendants of this line have been found in the South--particularly in South Carolina and Alabama. There is a 60/67 marker match to a Harrison family from Tytherington, Cheshire, England. This means that there is a 58% probability of a common Harrison ancestor in the last 16 generations, or since 1600, and a 92% chance of a common Harrison since the year 1400, so there is a definite connection between the Virginia and Cheshire, England branches of this Harrison family. This line is haplogroup **R-M269**.

Subgroup 5A

This Harrison line has an 60/67 match to members H-143 and H-167, and there is a 92% chance of a common ancestor between the English and American branches of this family.

This Harrison line descends from the well-known line of Battile Harrison, which is listed in lineage group 4. There is an excellent match to the line of H-2 above, on 66 of 67 markers, and matches H-143 on all 67 markers meaning there is a better than 99.9% chance of a common ancestor since about 1600. The likely explanation is that one of the early generations attributed to Andrew Harrison, lineage 4, actually belongs to George Harrison of lineage 5. Testing of other known descendants of this line will determine where the incorrect link is, so the line can properly be placed in lineage 5.

James Harrison b. 1827 Logan County, Kentucky is believed to be the father of Ulysses S. Grant Harrison of Indiana, but it is not yet proven. This James Harrison was the son of James Gabriel Harrison b. 1776 who married Elizabeth York and is part of the line of Nathaniel Harrison b. abt 1718 Prince George Co., VA, who married Olive Smith. That line is listed below in the untested lines section. Testing other descendants of that line can prove whether that connection is correct. It is clear, though, from the 33/34 match, that this line is part of lineage 5.

Lineage 7-The Robert Harrison Line of England and Boston

Subgroup 7A

Robert Harrison married Arabella Talbot. Her brother, St. George Talbot, was born in Dover, England in 1662, and died in New York City in 1767 at the age of 105. He left money to his sister, Arabella's children, and William Harrison, son of Robert and Arabella, contested the will. If Arabella and Robert Harrison married in England, then there is a possibility that Robert was from--or lived in--Dover before coming to Boston. Information on the Jonas Harrison family comes from Samuel W. Asbury's, "Jonas Harrison, Legendary and Historical," *Southwestern Historical Quarterly* v.45 (January 1942). Jonas Harrison was a prominent attorney in Buffalo, NY before coming to Texas, where he was active in the Conventions of 1832 and 1835. This line is haplogroup **I-M253**.

Lineage 8-The Harrison of Calvert County, Maryland Line

Subgroup 8A

This Maryland family group from Calvert County, Maryland is a separate family from other colonial Maryland Harrisons since its members belong to the **R-M512** haplogroup. While we do not yet have descendants tested from the earliest generations of the Calvert Co., MD Harrisons, it is likely that this line descends from the following Harrison line that begins with Richard Harrison, who moved from the Virginia colonies to Anne Arundel Co., MD in 1651. This line was compiled from several sources, including Charles F. Stein's *History of Calvert County, Maryland* (1960). The Harrisons of Calvert are often mixed up with other Harrisons of Talbot Co., MD and Virginia, so we would appreciate any additions or corrections.

James Henry Harrison b. 21 Nov 1845 TN, d. 14 May 1890 Gordon, TX, m. Mary Ellen Lenox

The line of Richard Harrison has a 24/25 match to the line of James Mason Harrison above. Given that they are both Harrisons from Calvert County with a 24/25 match, there is a connection between these two lines. The line below of William Harrison b. abt 1810 is not proven but is highly likely based on census records and the shared marker value of 12 for DYS-460.

While clearly a part of lineage 16, the line of William Henry Harrison is a very close match to the line of Jabez Harrison. Since both Harrison lines are from New Jersey, there may be a common ancestor either there, or back in Connecticut.

William Henry Harrison b. 1859 NJ, d. abt. 1890, m. Alphonsine Bourier

The family of Isaac C. Harrison is related to lineage 16; however, it is not clear how far back the common Harrison ancestor lived. There is a 46% chance of a common ancestor since about 1700, but a 90% chance of a common ancestor since the lifetime of this line's progenitor--Richard Harrison b. 1559.

Lineage 22-The Thomas Harrison of Knaresborough, Yorkshire Line- The Family of Cuthbert and Burr Harrison of Colonial Virginia

Subgroup 22A

Knaresborough is near Leeds, in Yorkshire. This lineage is from the *Visitation of Yorkshire, 1612* as cited in J. Houston Harrison's *Settlers by the Long Grey Trail* (1935). The arms of this family are given as: "Azure three demi lions erased Or. Crest: A demi lion as in the arms, holding a laurel wreath vertical." These arms are also the arms of Col. Burr Harrison of Chappawamsie, VA, 1722, which solidifies the connection of Burr Harrison's line to this older English family. Dugdale's *Visitation of Yorkshire, 1665* also discusses the descent from Thomas Harrison and Johan on p. 269 as "Harrisons of Allerthorpe. The Cuthbert Harrison line is comprised of descendants of Cuthbert Harrison who came from London, England and settled in Stafford County, Virginia. The data here are from *Two May Families of Hollow Square, Green County, Alabama*, by Bernice May Fuller as cited in *Harrison Notes, 2 April 1994*, by Charles W. Johnson, at: <http://freepages.genealogy.rootsweb.com/~harrisonrep/Johnson/JHN040294.htm> and from *A Brief History of the First Harrisons of Virginia*, by Henry T. Harrison (1915) at <http://freepages.genealogy.rootsweb.com/~harrisonrep/harrbios/HenryTazewellHarrison.htm>. The families of John & Thomas Harrison b. Fairfax Co., VA, are listed in the Harrison Genealogy Repository. Information on the Illinois branch of this family comes from the *Biographical Album of Fulton County, IL* (1890), p. 824-825. It is not proven that the James Harrison b. 1735, father of Moses Harrison b. 1771 was connected to the Stafford Co., VA line. We need to have members of this line tested to confirm or refute the connection. This family is haplogroup **R-M269**.

Lineage 25-The Thomas Harrison of Cumberland, England Line

This lineage was first noted in the *Visitations of London, 1633, 1634, 1635* as cited in J. Houston Harrison's *Settlers by the Long Grey Trail* (1935). While the family was residing in London in the 1630's, its origins in Greystoke, Cumberland, make it a northern family. Greystoke is not far from Bishop Auckland, Durham, and Yorkshire, where several English Harrison families had an ancestral home. The arms of this family are "Or on a fesse sable, three eagles displayed of the field, a crescent for difference. Crest: on a chapeau sable turned up and indented azure an eagles head Or, changed with a crescent." Information on the early lines of this Cumberland Harrison family as well as the Philadelphia, PA descendants

of the line also comes from the well-documented book, *Harrison, Waples, and Allied Families*, by William Welsh Harrison (1910). It is haplogroup **I-M223**.

The Harrison family lost the patent to their Greystoke lands to the D'acre family in the 1500s, and the members of the family spread to London, and to Stoneraise, in the parish of Westward, about 10 miles from Carlisle. William Welsh Harrison gives three early wills from the area of Harrisons who are most likely descended from this branch of the Harrison family. It is not known if they are any of the individuals listed above.

Lineage 28-The Thomas Harrison of Maryland Line

Subgroup 28A

This Harrison line comes from Maryland by way of North Carolina. Thomas Harrison, who was born in 1760, and his brother Richard, were brought to North Carolina by Isaac Robinson to the Lincoln County area. They were raised as orphans without education. Richard Harrison wrote in his Revolutionary War Pension application that he was "born in Mereland and brought to NC by Isaac Robinson." This family's haplogroup is still undetermined, since there are tested members on this line from both haplogroup E and haplogroup I. At this time, it is not clear which line is correct, and which belongs to a separate Harrison lineage group.

The line of Henry Harrison below matches member H-112 on 25 of 25 markers, indicating that there is a close relationship between these two branches of the family. As mentioned above, there is a discrepancy between results on this line, and either members H-112 and H-300 descend from a different Harrison family, or members H-87 and H-89 do. More testing on known descendants of lineage group 28 is needed to determine which line is correct.

Lineage 30-The Thomas Harrison of Broughton, Yorkshire Line

Subgroup 30A

The line of Thomas Harrison probably originated in Yorkshire. Early generations were baptized in Broughton-in-Craven, West Yorkshire. Family genealogist Chris Harrison found a will for a George Harrison of Elslack - the next village to Broughton, who d. 1723, in which he left money to his four brothers: Roger, William, Christopher and Charles. This likely ties the early generations of the family together as the Y-DNA from Thomas Harrison's great-grandson's lines matches closely. This family is haplogroup **Q-M242**.

Lineage 31-The Harrison of Staffordshire, England and Augusta Co., VA Line

Subgroup 31A

The line of Thomas Harrison came to Tazewell County from Augusta and Botetourt Counties. This family has been connected to the Burr Harrison line (lineage 22), but the DNA does not confirm that relationship. *The Wiseman Family and Allied Lines* by Eugene Wiseman (1991) discusses this line, and states that Thomas Harrison, progenitor of the Harrison family of Warren Co, TN was born ca. 1740 Botetourt Co. VA, and was the son of John Harrison, Jr. and grandson of John Harrison, Sr. The senior John Harrison was born between 1697 and 1710 and died in Botetourt Co. in 1786. No other tested families match this line. There is a match between the Harrisons of Staffordshire, England, and the Harrisons of Augusta Co., Virginia. This indicates a better than 97% chance of a common ancestor since 1600. This family is haplogroup **R-M269**.

The line of Philip Harrison of Wednesbury, Staffordshire, matches the line of John Harrison above on 65/67 markers. This means that there is a 97% chance of a common Harrison ancestor within the last 12 generations, a 99.5% chance of a common Harrison ancestor within the last 16 generations or about 400 years, so these lines are unquestionably related, and share a common English ancestor. It is possible that the John Harrison above was the son of Philip Harrison listed below.

Lineage 32-The Robert Harrison of Virginia or Georgia Line

Based on the 1850 census of Smith County, Mississippi, Robert Harrison listed his birthplace as Virginia. Other family members noted Georgia as their father's birthplace, so it is not clear whether Robert Harrison was born in Virginia and

migrated to Georgia before moving west to Alabama and Mississippi, or if he was born in Georgia. This family is haplogroup **G**.

Many Harrison family genealogists are interested in seeing if there is a connection between their family and the line of the Harrison presidents and signer of Declaration of Independence. Many Harrisons have a family legend passed down through the generations that their Harrison ancestor was a "cousin of the president." Using DNA, we can now support, or refute, those old stories. Lineage 36-The Cuthbert Harrison Line of Barnwell, South Carolina and Georgia

Subgroup 36A

This line, like lineage 22, goes back to Burr Harrison and Frances Burdette. Unlike lineage 22, however, this line is haplogroup **I-M253**. There are not enough 17th century Harrison lines tested yet to be sure whether Burr Harrison was haplogroup R or I, so one of these lines will need to be adjusted in the earliest generations.

Lineage 42-The Harrison Line of Middlesex and Derbyshire, England and Virginia

Subgroup 42A

The earliest known member of this line is Captain Thomas Harrison, master of the ship, "Honour," who married Alice Moore of Stepney Parish. He married second, Elizabeth Stott, in 1646 at St. Dunstan's Church, Stepney. The English branch of this family also comes from Horsely Woodhouse, Derbyshire. There is a 65/67 match to a Harrison line from Albemarle Parish, Sussex County, Virginia. There is a 66/67 match between the Derbyshire line and the line of Daniel Harrison of Lancaster County, and an exact 37/37 match between the line of Thomas Harrison and that of Daniel Harrison. The 66/67 match between the English and American lines of this family indicate a 99.3% chance of a common ancestor within 12 generations. This family is haplogroup **I-M223**.

According to Charles Harrison, the line of Benjamin Harrison is haplogroup **I-Z58**. This is several branches upstream of the haplogroup of the Robert Harrison, but since Robert Harrison's line also contains I-Z58, and it is the only line in the project that does, it is very likely these two lines are connected.

Lineage 48-The William Harrison Line of Westmoreland & King George Co., Virginia

Subgroup 48A, 48B

There have been many different ancestries proposed over the years for William Harrison b. abt 1702. He is often connected to the Anthony Harrison line by Robert Harrison b. abt 1674. Others have William b. abt 1702 as the son of George Harrison. Still other researchers claim that the Burdett name connects this family to Lineage 22, since Burr Harrison married a Burdette. The results of both presumed members of this line, however, show no relationship to any of those lines and that it is another Harrison line unrelated to these other lineage groups. In addition, the two tested lines of

James Harrison b. abt 1750 do not match, so there is either a mistake in these lines, or an adoption. Several more Harrisons descended from this line are needed to sort out the connections. This family is haplogroup **E-P277** or **I-M223**.

Lineage 50-The Gabriel Harrison Line of Charles City Co., Virginia

There are earlier, not proven generations for this line discussed in *A Harrison Genealogy*, a manuscript in the DAR Library in Washington, DC, compiled by Katherine Epps Bundick (1977). Gabriel Harrison res. Charles City Co., VA 1673, may have been descended from Thomas Harrison of Clerkenwell Parish, Middlesex, England, who married Rebecca Carr in 1669. Thomas and Rebecca Harrison were executors of the will of William Harrison. Either could have been the ancestor of Gabriel Harrison. This family is haplogroup **I-L126**.

Lineage 73-The Thomas Harrison of Isle of Man and County Down, Ireland Line

Subgroup 73A

This family originated in the parish of Rushen in the Isle of Man, where many of the family still reside today. The family name was colloquially Kinry. This is a translation of Harrison into the Manx language (or possibly vice-versa), *Mac* 'son of', *Inri* 'Henry', giving *Mac Inri*. The *Ma-* in *Mac* was systematically dropped in the late 16th century in the Isle of Man giving the form *Kinry*. Though names were almost exclusively recorded in English in official documents, the colloquial form is sometimes found. This family is haplogroup **R-M269**.
